Rakuten Medical

Haiying Dong

Senior Vice President of Global Data and Analytics,
Rakuten Medical, Inc.

As Senior Vice President of Global Data and Analytics at Rakuten Medical, Haiying leads biostatistical and data strategy efforts across global clinical development and regulatory submissions for the Alluminox® platform-based photoimmunotherapy. She plays a pivotal role in advancing statistical and regulatory strategies for registrational programs.

Since joining Rakuten Medical in 2019 to support the Japan Biologics License Application for ASP-1929 photoimmunotherapy, Haiying has established a strong foundation for quality, compliance, and operational excellence in clinical study design, data collection, and data analysis. She has led the development and implementation of global standard operating procedures and best practices across statistical science, programming, and data management. Her leadership has strengthened scientific rigor, regulatory alignment, and consistency across global development programs, enhancing the company's ability to make data-driven decisions and execute successfully on key development milestones.

With more than 25 years of experience in the biopharmaceutical industry, Haiying brings deep expertise in clinical development. Prior to joining Rakuten Medical, she held leadership and technical roles in statistical data analysis at BeiGene, Medivation, AstraZeneca, and Amylin Pharmaceuticals, where she contributed to the development and regulatory approval of multiple innovative therapies.

Haiying received her Bachelor of Science Degree in Biology from Fudan University in China and Master of Science in Statistics from New Mexico State University.
